SUMMARY

Full-stack software engineer with an exceptional track record of turning ambitious ideas into polished products. I have 7 years of experience using React, TypeScript, and PostgreSQL. I take pride in my work being correct, performant, and maintainable. If I don't know something, I admit it, I learn it, then I teach it. I have excelled both as a leader and sole contributor in solar, public safety, and cosmetics industries.

EXPERIENCE

Lead Software Engineer, Wyssling Consulting — 2021–Present

- Led the development of a React, Node, and PostgreSQL CRM platform for managing solar projects for over 300 clients, replacing a costly (\$8,000/mo) RDP server and improving productivity, accuracy, and client-satisfaction.
- Built an API for clients to automate project submission and drastically reduce turnaround times.
- Developed an invoice system that aggregates project details and services rendered, and generates a PDF.
- Collaborated with structural and electrical engineers to build a queue system for seamless project hand-off.
- Led a team of 3. Conducting code reviews, teaching scalable design patterns, and collaborative feature planning.
- Automated deployments via AWS using Github, Elastic Beanstalk, EC2, and CodePipeline.

Software Engineer, SkyFine USA — 2020–2021

- Migrated an existing PHP service to React, React Native, and Kotlin. Built an intuitive mobile app for technicians to install wireless Ignition Interlock Devices (IID) and configure them via Bluetooth.
- Built an API for Ignition Interlock Devices (IID) to parse and store photo and location data via GPS.
- Built a React dashboard for management of photos, location data, and producing court-ordered reports.

Network Administrator, Yunique — 2014–2019

- Managed local network infrastructure. Configured routers, switches, firewalls, VLANs, and a dual-ISP failover.
- Ran Cat-5 cables between server rooms, floors, and cubicles in a 5-story building and adjacent warehouse.
- Troubleshooting and IT help-desk for over 700 employees. IT Onboarding, the first friend for new employees.

Office Max, Technology Consultant — 2011–2014

- Retail computer repair, where I developed my ability to convey technical concepts to non-technical stakeholders.
- Printer and computer sales, and upselling services such as on-site assembly and in-home installs.
- Regularly achieved the most “MaxPerks” sign-ups; the Office Max rewards program.

EDUCATION

DevMountain Code Bootcamp – 2017

Cottonwood High School – 2012

SKILLS

TypeScript, React, TailwindCSS, tRPC, Next.js, PostgreSQL, Drizzle, Prisma, Authentication, Rust, Git, AWS Elastic Beanstalk, EC2, S3, CodePipeline, REST APIs, Database Design, Network Topology, Hardware Troubleshooting

AWARDS

Employee of the Month, Nov. 2022 – For building an app to manage solar engineering requirements in 15,000+ cities.

Employee of the Month, Mar. 2024 – For the success of our CRM platform.
